PROFESSIONAL SUMMARY

Hands-on AI Product Manager with 5+ years who finds where hours are lost to manual steps and disconnected AI tools, then ships the fix end to end. At Meriton, introduced AI to a company with no prior machine learning: an AI hub for idea intake through project delivery, Apti (a CRM guidance overlay used by 500 users), an equipment-code generator for sales, and agents for bids and invoicing, prototyped in Lovable and built with a 4-5 person dev and infra team on Power Apps and Azure. Also leads a 25+ person cross-functional CRM/ERP platform team; earlier 0-to-1 builds include a clinical AI module and the AVA patient chatbot.

PROFESSIONAL EXPERIENCE

Product Manager, AI Systems & ERP

Meriton | Irving, TX | November 2024 - Present

- Saw AI ideas, project requests, and know-how scattered across email, chats, and one-off tools; prototyped the UI in Lovable, then built an AI hub with a 4-5 person dev and infra team (Power Apps, Azure) that runs idea intake, auto-triage, project tracking, newsletter, community, and knowledge base in one place; 200 submissions from 140 users in 3 months, now in pilot with 60 enterprise and transformation users.
- Found CRM users stuck on multi-step processes and leaning on the helpdesk; launched Apti, a Microsoft CRM overlay with guided workflows, tooltips, and a built-in AI assistant, now used by 500 users, with 90% fewer process-error helpdesk requests and faster onboarding.
- Sales reps spent about a day hand-building equipment codes per estimate across geographies and field-service rules; built an app on client data that generates them automatically, cutting estimation from 1 day to 1-2 hours for 30-40 reps.
- Bid requests arrived by email and were keyed in by hand; built an AI agent (Power Automate, Azure Logic Apps) that reads the email, drafts the bid, and creates the CRM opportunity, cutting entry from 1 hour to 10 minutes across 200+ bids per month (over 160 hours saved monthly), plus an ML bid-rating model that scores bids on credit, safety, and relationship history.
- Linked Finance & Operations automations end to end: an invoice agent posts and clears invoices and routes only exceptions to people, so 90% of 500+ monthly invoices post touch-free; a CRM-ERP integration framework cut errors by 83% (30 to 5 per week) at a 98% SLA.
- Shipped an LLM/RAG layer (Azure OpenAI, prompt engineering) that automated 60% of manual workflows; built an evaluation framework (200+ test scenarios, BLEU/ROUGE, deployment gates) that cut hallucinations by 45% and keeps outputs reliable in production.

Product Manager

DM Clinical Research | Houston, TX | June 2024 - October 2024

- Led 0-to-1 development of a clinical payment and patient-recruitment module for an enterprise AI product, improving patient onboarding by 15% and reducing overbooking by 8% within 4 months.
- Shipped AI chatbot AVA end-to-end, lifting patient engagement by 18%; ran 20+ site interviews and delivered Figma UX enhancements that raised user engagement by 26%.

Product Manager Intern

Dell Technologies | Round Rock, TX | May 2023 - August 2023

- Drove 0-to-1 delivery of an AI-powered total-cost-of-ownership (TCO) tool; improved accuracy from 61% to 90% by leading a 3-person QA team and lifted customer NPS by 8 points.

Technical Product Manager

Zycus | Mumbai, India | December 2020 - June 2022

- Drove backlog and roadmap for the procurement suite, prioritizing by business impact and contributing to $1.5M in incremental quarterly sales; lifted sprint velocity by 10% through clear user stories and acceptance criteria.

Technology Consultant

PwC | Kolkata, India | July 2019 - November 2020

- Implemented Agile practices that improved team productivity by 20%; shipped Dynamics 365 ERP workflow improvements and used SQL for insights, raising customer satisfaction by 6%.

SKILLS

AI/ML: LLM integration (OpenAI, Azure OpenAI, LLaMA), RAG pipelines, prompt engineering, model evaluation (BLEU/ROUGE), agentic workflow orchestration, AI assistants, 0-to-1 AI builds

Product: 0-to-1 Builds, Product Strategy & Roadmap, User Research, OKRs/KPIs, A/B Testing, Go-to-Market (GTM), PRD/UAT, Stakeholder Management

Technical: Power Apps, Power Automate, Azure Logic Apps, Azure DevOps, Dynamics 365 CRM, Finance & Operations, SQL, APIs

Design & Tools: Lovable, Figma, Miro, Power BI, Tableau, Sigma, Jira, Confluence, Asana

EDUCATION

M.S., Management Information Systems | Texas A&M University, College Station, TX | August 2022 - May 2024

B.Tech, Electrical Engineering | IIEST Shibpur, Kolkata, India | July 2015 - May 2019
